

STOP.THINK.CONNECT.

STOP. THINK. CONNECT. is a national public awareness campaign aimed at increasing the understanding of safe computing practices.

Here are some tips for keeping *your* personal information safe online:

Stop hackers from accessing your accounts – set secure passwords.
Stop sharing too much information – keep your personal information personal.
Stop – trust your gut. If something doesn't feel right, *stop what you are doing.*

Think about the information you want to share before you share it.
Think how your online actions can affect your off-line life.
Think before you act – don't automatically click on links.

Connect over secure networks.
Connect with people you know.
Connect with care and be on the lookout for potential threats.
